

19 January 2009

Information note for participants attending the ECML E-VOLLution project workshop, 26-28 February, 2009

We were pleased to receive a copy of your nomination as participant and representative of your country at the ECML E-VOLLution project workshop in Graz in February. We are looking forward very much to meeting you virtually online and face-to-face at the ECML.

IN FACT, THE WORKSHOP HAS ALREADY STARTED – AT LEAST ONLINE!

In order to get started in the workshop , we would like you to sign up on our Moodle platform ¹⁾, then to visit the individual forums there and to make your own contributions. In the Forum of each member of the animating team, you will see his/her abstract on the topic he/she will be dealing with in the workshop. Please read each abstract carefully and then write at least one question for each member of the animating team underneath his/her abstract.

In addition, would you please send a copy of the enclosed questionnaire (including a recent, digital photo) to Bernard Moro, our webmaster, at the following e-mail address: bernard.moro@gmail.com . He will then float the information on the website.

Please also visit the project website at www.ecml.at/projects/voll and the project information platform at <http://evollution.ecml.at> . The project website, together with the platform, will give you an overview of what we have achieved so far, and, we hope, an idea of what it is we hope to achieve in the course of the workshop and the rest of the project's lifetime.

Please do not hesitate to contact me at E-VOLLution@t-online.de should you have any questions which are not answered on the Moodle platform (our preferred mode of communication).

Yours sincerely,

Tony Fitzpatrick
Project Coordinator

¹⁾ To join the E-VOLLution project at <http://fugo.fuv.se/>, on our Swedish partner's Moodle platform, called "Fugo", create a user account [under the Login button, top right, operating, if necessary, the drop down menu to change language from Swedish "Svenska (sv)" to English]. You will receive a message which contains a link. Following the link takes you back to the platform, where you will now be able to log in.
